ORACLE®
Validated Integration

Oracle Hospitality

Oracle Validated Integration provides customers with confidence that a partner's integration with an Oracle on-premise application is functionally sound and performs as designed. This can help customers reduce deployment risk, lower total cost of ownership, and improve the user experience related to the partner's integrated offering.

Lighting and building control management for your complete property

Interact Multiroom System Manager delivers real-time operational transparency across your property, enhancing guest experience while improving staff efficiency and saving energy.

As well as sophisticated lighting control, Interact software integrates with other systems, including HVAC and PMS, to provide unified visibility and control via our intuitive dashboard interface.

Authorized users are empowered with access to connected lighting and energy management, individual room status, device and system health monitoring, and the ability to make local or global system adjustments to ensure optimum performance and guest comfort.

Company Overview

Philips Dynalite has more than 30 years' experience developing the world's most advanced lighting control solutions, while Interact is a cutting-edge portfolio of IoT-enabled software suites that manage connected lighting systems and the data that those systems collect.

Proudly operating together as global Signify brands, Philips Dynalite and Interact provide a secure, scalable platform that collects, analyzes, and shares data back and forth between connected light points, sensors, controllers, and interfaces.

Integration Overview

Interact provides integration options for third-party hardware and systems via the Philips Dynalite range of integration devices and network gateways, as well as API support for secure access to system alerts, monitoring, and guestroom control.

Integration Details

Interact Multiroom System Manager provides a certified integration with Oracle Hospitality OPERA for the following functionality:

- Check-in:
    - VIP status (VIP mode)
    - User-defined preferences (A0-9)
